

## Safety Data Sheets (GHS-SDS)

Product Name: SJ3D

Revision Date: Jan 26, 2024

Issue date: Feb 25, 2024

Version: 4.8

Compiled in accordance with the 10th revised edition (ST/SG/AC.10/30/Rev.10 2023) of the UN GHS system..

### **SECTION 1: Identification**

#### **1.1 GHS Product identifier**

Chemical Name                      POLYESTER RESIN

#### **1.2 Other means of identification**

Chemical trade name              SJ3D  
Molecular formula                  Mixture, not applicable.  
Structural formula                  Mixture, not applicable.  
Molecular weight                   Mixture, not applicable.  
CAS number                          Mixture, not applicable.

#### **1.3 Recommended use of chemical and restrictions on use**

Recommended use of the product

Resin used in the production of powder coatings.

Restricted use of the product

Only for industrial, professional or research purposes, please consult the manufacturer for other information.

#### **1.4 Supplier's details**

Manufacturer                      Anhui Shenjian New Materials Co.,Ltd.  
Address                              NO.8 Baoshun Road, Qiaobei Industrial Park, Wuhu Economic & Technological  
Development Area, Anhui Province, China  
Post code                            241008  
Contact number                    +86-553-5316333

Emergency telephone  
number                                +86-553-5316333

### **SECTION 2: Hazard identification**

#### **2.1 Classification of the substance or mixture**

	Substance	<input type="checkbox"/>	Mixture	<input checked="" type="checkbox"/>
GHS hazard category				
Serious eye damage/eye irritation	Category 2A			
Skin sensitization	Category 1			
Respiratory sensitization	Category 1			

**2.2 GHS label elements**

Signal word	Danger.
Hazard statements	
H317	May cause an allergic skin reaction.
H319	Causes serious eye irritation.
H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Precautionary statements	
Prevention	
P261	Avoid breathing dust/fume/gas/mist/vapours/spray.
P264+P265	Wash face and hands thoroughly after handling.Do not touch eyes.
P271	Use only outdoors or with adequate ventilation.
P272	Contaminated work clothing should not be allowed out of the workplace.
P280	Wear protective gloves/protective clothing/eye protection/face protection.
Response	
P302+P352	IF ON SKIN:Wash with plenty of water.
P304+P340	IF INHALED: remove person to fresh air and keep comfortable for breathing.
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes.Remove contact lenses, if present and easy to do.Continue rinsing.
P333+P317	If skin irritation or rash occurs: Get medical help.
P337+P317	If eyes irritation persists: Get medical help.
P342+P316	If experiencing respiratory symptoms: Get emergency medical help immediately.
P362+P364	Take off contaminated clothing and wash it before reuse.
Storage	
P410+P403	Protect from sunlight. Store in a well-ventilated place.
Disposal	
P501	Dispose of contents/container in accordance with local/regional/national/international regulations.

## Pictograms

**2.3 Other hazards which do not result in classification**

Handling and/or handling of this substance may generate dust that can cause mechanical irritation of the eyes, skin, nose and throat.

### ***SECTION 3: Composition/information on ingredients***

#### ***Substances/Mixtures***

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### ***SECTION 4: First-aid measures***

#### ***4.1 Description of necessary first-aid measures***

Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms.
Skin contact	Flush contaminated skin with plenty of water.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if symptoms.
Ingestion	Wash out mouth with water. Get medical attention if symptoms.

#### ***4.2 Most important symptoms/effects, acute and delayed***

Potential acute health effects	
Inhalation	Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.
Skin contact	No known significant effects or critical hazards.
Eye contact	Causes eye irritation.
Ingestion	No known significant effects or critical hazards.
Over-exposure signs/symptoms	
Inhalation	Adverse symptoms may include the following: respiratory tract irritation, coughing.
Skin	No specific data.
Eye	Adverse symptoms may include the following: pain or irritation, watering, redness.
Ingestion	No specific data.

**4.3 Indication of immediate medical attention and special treatment needed, if necessary**

Notes to physician	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	No specific treatment.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

**SECTION 5: Fire-fighting measures****5.1 Suitable extinguishing media**

Suitable	Use foam, CO <sub>2</sub> or dry powder fire extinguishing agent.
Not suitable	Avoid using direct water to extinguish fires. Direct water may cause the splash of flammable liquids, and in severe cases, spread the fire.

**5.2 Specific hazards arising from the chemical**

Unusual fire/explosion hazards	No special danger.
Hazardous thermal decomposition products	In the event of a fire, harmful decomposition products may be produced, such as carbon monoxide, carbon dioxide, black smoke, aldehydes, and organic acids.

**5.3 Special protective actions for fire-fighters**

Firefighters should wear breathing masks ((conforming to MSHA/NIOSH requirements or equivalent)) and full protective clothing. Firefighters should put out the fire at a safe distance upwind.

Prevent firefighting water from polluting the surface and groundwater system..

**SECTION 6: Accidental release measures****6.1 Personal precautions, protective equipment and emergency procedures**

For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training.
	Irrelevant and unprotected personnel enter. Do not touch or walk past the spilled material.
	Cut off all ignition sources. No flames, smoking or flames are allowed in the hazardous area. Avoid breathing dust. Provide adequate ventilation. Wear suitable respirators when there is insufficient ventilation. Wear suitable personal protective equipment.
For emergency responders	If you need to wear special clothing to deal with spills, please refer to section 8 for information on suitable and inappropriate materials. See the information in the section "Non-emergency responders".

**6.2 Environmental precautions**

Avoid spreading and running away of spillage, and avoid spillage from contacting and entering the soil, rivers, sewers and sewage pipes.

May be harmful to the environment if released in large quantities.

**6.3 Methods and materials for containment and cleaning up**

Small leak	Move the container away from the spill area. Use a vacuum cleaner to clean up or thoroughly clean up contaminants and place them in waste containers with designated labels.
Massive leaks	Move the container away from the spill area. Approach the spill from upwind. Prevent entry into sewers, waterways, basements or confined areas. Use a vacuum cleaner to clean up or thoroughly clean up contaminants and place them in waste containers with designated labels. Avoid raising dust and avoid spreading it by wind.

Note: For personal protective equipment, see section 8; for waste disposal, see section 13.

**SECTION 7: Handling and storage****7.1 Precautions for safe handling**

Protective measures	Put on appropriate personal protective equipment (see section 8). No ingestion. Avoid contact with eyes, skin and clothing. Avoid breathing dust. Avoid release to the environment. Prevent dust accumulation. Use only under adequate ventilation. Wear suitable respirators when there is insufficient ventilation. When transferring materials, the container and equipment should be grounded to release static electricity generated during material transportation.
Advice on general	Eating, drinking, and smoking should be prohibited in areas where this substance is handled, stored, and processed. Staff should wash their hands before eating, drinking and smoking. Before entering the eating area, remove contaminated clothing and protective equipment.

**7.2 Conditions for safe storage, including any incompatibilities**

Conditions for safe storage	Do not store above the following temperature: 30°C (86°F (Fahrenheit)). Store in accordance with local regulations. It should be stored separately from oxidizing substances and avoid mixed storage. Avoid direct sunlight, keep away from heat and fire sources, and store in a cool, dry and ventilated place.
Packaging Materials	It is recommended to use the packaging materials allocated by the supplier. It is not recommended to use other containers or packaging materials to prevent pollution.
Remarks	Avoid raising dust.

**SECTION 8: Exposure controls/personal protection****8.1 Control parameters**

Occupational exposure Limits:

Ingredient name	Benzene-1,2,4-tricarboxylic acid 1,2-anhydride (CAS. 552-30-7)			
Country / Region	Occupational exposure limit (8h)		Occupational exposure limit (short time)

Australia	0.005	0.039	—	—

Biological limits:

No data.

Monitoring method

EN 14042 Workplace Air A guide to procedures used to assess exposure to chemical or biological agents.

### **8.2 Appropriate engineering controls**

Use only under adequate ventilation.

If dust, smoke, gas, vapor or mist are generated during use, please use process isolation equipment, local ventilation systems or other engineering controls to ensure that the content of airborne pollutants in the working environment of workers is below the recommended or legal limit. The process control method used should also control the concentration of gas, steam or dust below the exposure limit value.

### **8.3 Individual protection measures, such as personal protective equipment(PPE)**

Eye/face protection

Wear safety glasses with side shields.

Skin protection

It is recommended to wear dust-proof clothing.

Respiratory protection

If the result of the risk assessment shows that it is necessary, please use a suitable breathing apparatus with a particulate filter that meets the standard. The choice of respirator must be based on known or expected exposure levels, product hazards, and safe working limits of the selected respirator.

Hand protection

If the result of the risk assessment shows that it is necessary, please always wear chemical-resistant and impermeable gloves that meet the standards when you come into contact with chemical products.

Hygiene measures

After exposure to chemicals, wash hands, forearms and face thoroughly before meals, before smoking, before going to the toilet, and after work. Use appropriate techniques to remove clothing that may have been contaminated. Contaminated clothing needs to be washed before reuse. Ensure that the eyewash station and safety shower room are close to the workplace.

**Remarks**

All chemical protective gloves are suitable for use to avoid contact with skin.  
The choice of gloves should be aimed at the physical protection of hands.

## **SECTION 9: Physical and chemical properties and safe characteristics**

Physical State

Solid flake particles.

Colour

Pale white or light yellow.

Odour

Odourless.

Odor threshold

No data.

Melting point/freezing point

No data.

Boiling point, initial boiling	No data.
Flammability (solid or gas)	Not flammable, but will burn if exposed to flame or high temperature for a long time.
Lower and upper explosion	No data.
Flash point	>350 (°C) (closed cup)
Auto-ignition temperature	>350(°C)
Decomposition temperature	>350(°C)
PH	Not applicable.
Kinematic viscosity	Not applicable.
Solubility (mg/L)	Partially soluble in the following materials: diethyl ether and acetone. Insoluble in the following materials: cold water, hot water, methanol and n-octanol.
Solubility in water (mg/L)	No data.
Partition coefficient n-octanol/water(log value)	No data.
Vapour pressure(kPa)	No data.
Evaporation rate	No data.
Relative density (water = 1)	1.2
Density (g/cm <sup>3</sup> )	1.2 (23°C)
Bulk density	600 to 750 kg/m <sup>3</sup>
Relative vapor density (air=1)	No data.
Particle characteristics	No data.

## ***SECTION 10: Stability and reactivity***

### ***10.1 Reactivity***

No specific test data related to reactivity available for this product or its ingredients.

### ***10.2 Chemical stability***

This product is stable.

It is stable under recommended storage and handling conditions (see section 7).

### ***10.3 Possibility of hazardous reactions***

Under normal storage and use, hazardous chemical reactions will not occur.

### ***10.4 Conditions to avoid***

Avoid generating dust and all sources of ignition (spark or flame) during handling.

Take precautions to prevent electrostatic discharge. To prevent fire or explosion, the container and equipment should be grounded when transferring materials to release static electricity generated during material transportation. Prevent dust accumulation.

### ***10.5 Incompatible materials***

Reactive or incompatible with the following materials: oxidizing materials.

### ***10.6 Hazardous decomposition products***

Under normal storage and use conditions, hazardous decomposition products will not be produced.

### 11.2 Information on likely routes of exposure

No data.

Potential acute health effects

Eye contact Causes eye irritation.

Inhalation Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.

Skin contact No known significant effects or critical hazards.

Ingestion No known significant effects or critical hazards.

**11.3 Symptoms related to the physical, chemical and toxicological characteristics**

Eye contact Adverse symptoms may include the following: pain or irritation, watering, redness.

Inhalation Adverse symptoms may include the following: respiratory tract irritation, coughing.

Skin contact No specific data.

Ingestion No specific data.

**11.4 Delayed and immediate effects and also chronic effects from short and long term exposure**

Short term exposure

Potential immediate effects Not available.

Potential delayed effects Not available.

Long term exposure

Potential immediate effects Not available.

Potential delayed effects Not available.

Potential chronic health effects

Ingredient name	Result	Species	Dose	Exposure
Benzene-1,2,4-tricarboxylic acid 1,2-anhydride CAS 552-30-7	Sub-chronic NOAEL Oral	Rat - Male,Female	10000 mg/kg/day ( Highest tested dose )	—

## ***SECTION 13: Disposal considerations***

### ***13.1 Disposal methods***

Waste chemicals

The generation of waste should be avoided or reduced as much as possible. The disposal of products, solutions and by-products shall comply with environmental protection.

Dispose of surplus and non-renewable products through a licensed waste disposal contractor. Waste should not be discharged into the sewer without disposal, unless it fully complies with the requirements of the competent authority in all jurisdictions.

Requirements of waste disposal regulations and relevant local regulations.

Contaminated packaging

Should be recycled. Only when recycling is not feasible, should incineration or landfill be considered. Use safe methods to dispose of this product and its container.

Empty containers or linings may retain some product residues.

Avoid spreading and running away of spillage, and avoid spillage from contacting and entering the soil, rivers, sewers and sewage pipes.

### ***13.2 Disposal considerations***

Please refer to the "Disposal methods" section.

### ***13.3 Other information***

As far as the supplier currently knows, this product is not considered hazardous waste.
